

1

NCMS Plan practice engages with Practice Wellness and expresses interest in biometric screening.

2

EI contacts the Practice Administrator to initiate any coordination and planning of the biometric screening and wellness counseling event.

3

Participating members complete a Health Assessment.

4

A date is coordinated and confirmed for the biometric screening and wellness counseling event.

5

Participants and their subscriber information is provided to EI to allow for a secure and HIPAA compliant data transfer to the Health Assessment.

6

The Practice Administrator plans for a dedicated and private work space for the EI team and biometric screening equipment.

7

Participants meet with EI Wellness team members to have their biometric screening completed - glucose and lipid panel via finger stick; blood pressure; waist circumference; body composition; and height and weight (BMI).

8

Individual results are reviewed with the participant at the time of the visit along with NCMS Plan resources to further assist with enhancing their personal wellness goals.

9

Biometric data is uploaded to the Health Assessment.

10

NCMS Plan practice is provided aggregate data to further develop wellness initiatives and strategy.
